

1. Internet pārlūkā ieiet October CMS mājaslapā un izveidot kontu (<https://octobercms.com/>).
2. Izveidot jaunu projektu.

The screenshot shows the October CMS dashboard. At the top, there is a navigation bar with links: Features, Free License, Pricing, Resources, Marketplace, and Partners. On the right, there is an 'Account' dropdown menu with options: Projects, Author, Partner / Marketing, Premium Support, Settings, Subscription Plan, and Sign Out. Below the navigation bar, there is a yellow banner with a welcome message and a 'Dismiss' button. The main content area has a tabbed interface with 'Projects' selected. Below the tabs, there is a search bar and a 'Create project' button. A table lists the projects, with one project named 'Demo' shown. The table has columns for Project, License, Plugins, and Themes.

Project	License	Plugins	Themes
Demo	Active until May 6, 2025	0	0

- Zem pogas "Account" uzspied "Projects".
 - Create project.
3. Kad tas izdarīts uzspiest uz "Display license key" pogas lai iegūtu licenci.

The screenshot shows the 'Demo' project details page. The page has a tabbed interface with 'Plugins' selected. The 'Plugins' tab shows a message: 'There are no plugins bound to this project'. On the right side, there is a sidebar with the following information: Project ID (#285908), License Key, and a 'Display License Key' button. Below the sidebar, there is a link to the 'Projects documentation'.

Project ID: #285908

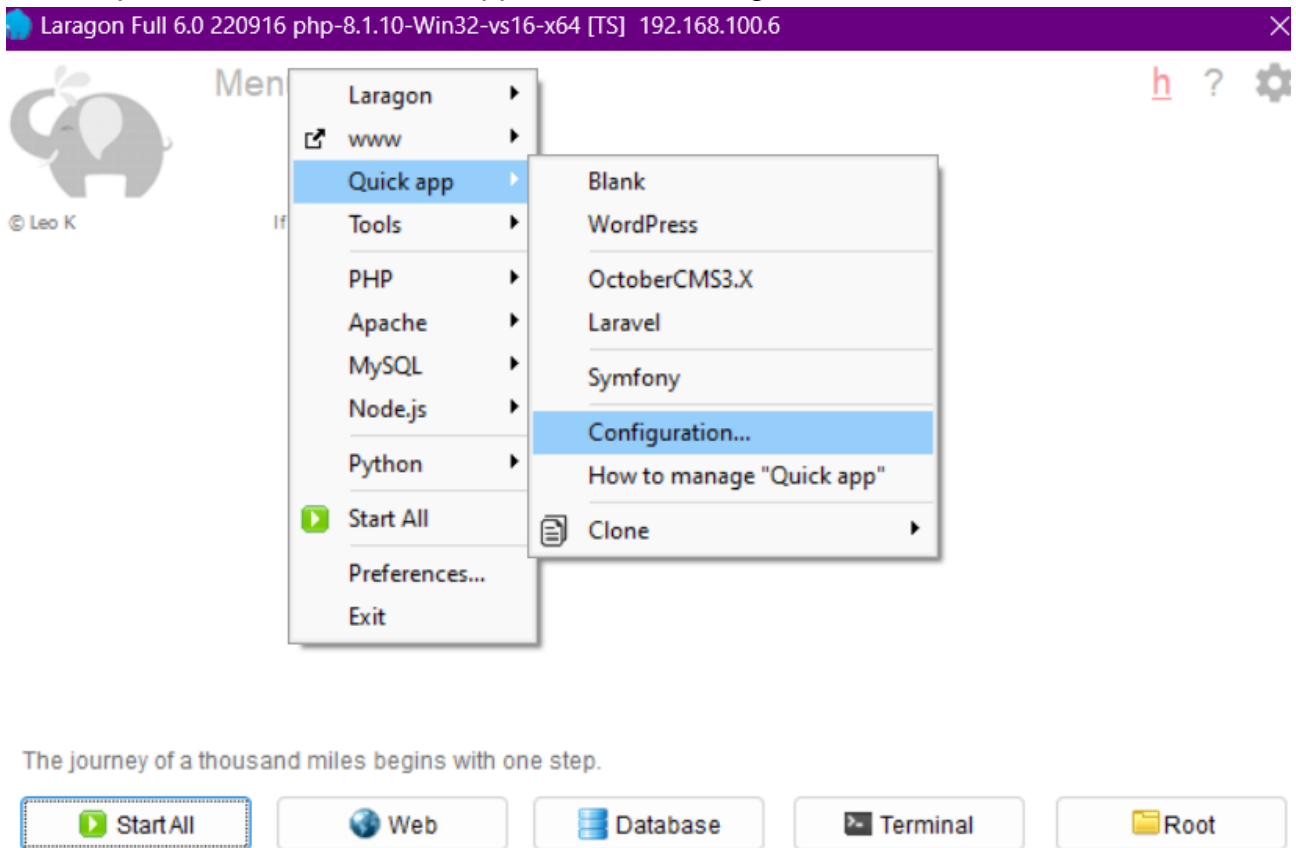

License Key: Use your License Key to bind this project to your October CMS installation and allow access to plugins and themes assigned to the project.

Display License Key

Read the [Projects documentation](#) to learn about October projects and how they can help you.

4. Tagad atver Laragon un uzspied "Menu".

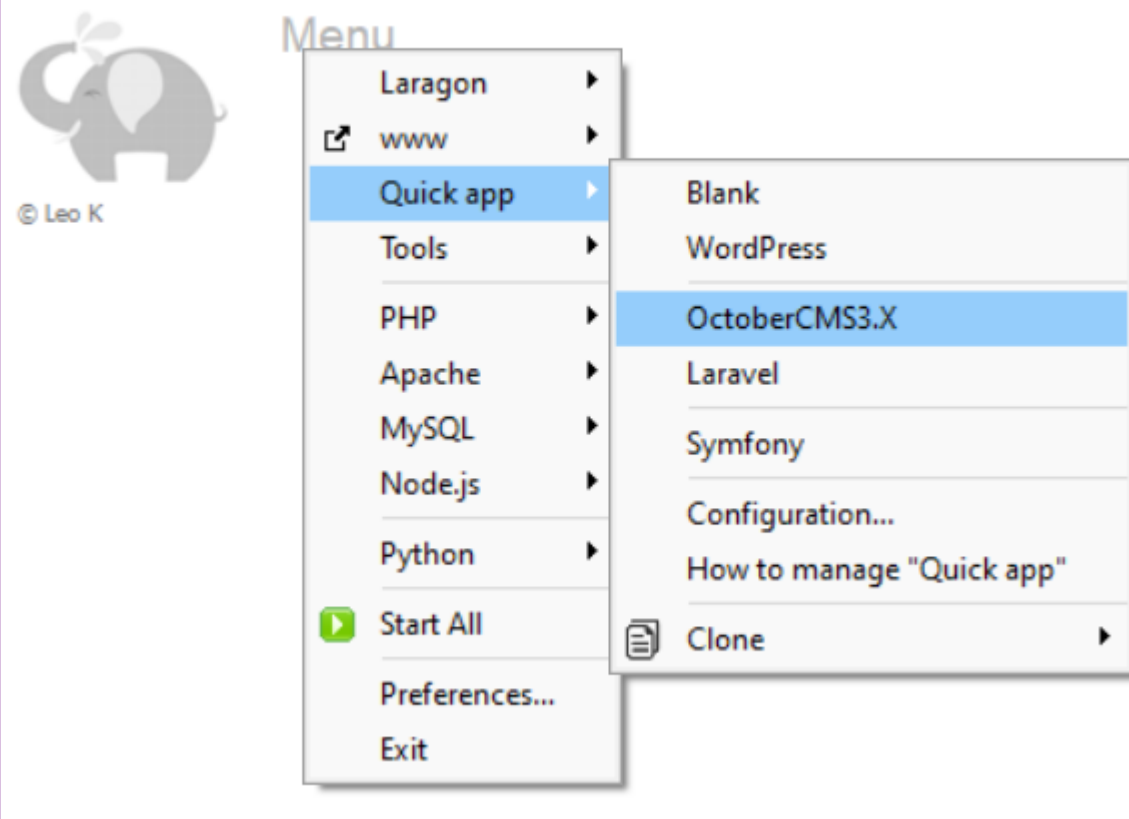

5. Aizvelc peles kursoru uz "Quick app" un atver "Configuration".

6. Šeit zem "Laravel" ievieto šādu komandu "OctoberCMS3.X=composer create-project october/october %s"

```
# Laravel
OctoberCMS3.X=composer create-project october/october %s
Laravel=composer create-project laravel/laravel %s --prefer-dist
# Laravel (zip)=PATH-TO-YOUR-ZIP-FILE
### Laravel dev-develop=composer create-project laravel/laravel %s dev-develop
-----
```

7. Tagad atgriezies atpakaļ "Laragon" galvenajā lapā un nospied uz "OctoberCMS3.X", taču atceries nospiegt "Start all".

8. Ieraksti savas lapas nosaukumu.

9. Tagad ievadi šādas komandas:

- `composer create-project october/october myoctober`
- Kad komanda izpilda savu funkciju vadi nākamo.
- `cd myoctober`
- Tagad vadi instalācijas komandu.
- `php artisan october:install`

10. Atbildi uz jautājumiem:

- Kādu valodu vēlies.
- "Application URL" vadi: <http://nosaukums.test> (nosaukums vietā tavas mājaslapas nosaukums).
- Nākamo var izlaist.
- Izvēlies [1].
- Nākamās 2 var izlaist.
- "Database name" vari rakstīt to pašu ko rakstīji kā mājaslapas nosaukumu.
- "Login" un "Password" arī vari izlaist.

- Šeit raksti "yes"

Demo Content

```
Install the demonstration theme and content? (Recommended) (yes/no) [yes]:  
> |
```

- Tagad tev prasīs licenci ko ieguvi sākamā, pie izveidotā projekta October CMS kontā. levadi to.
- Pēdējais kas jāizdara ir jāievada šī komanda "php artisan october:migrate", un jāaiziet uz interneta pārlūku un jāievada mājaslapas adresi ar ".test" galā.
- Ielogojies spiežot uz "Backend area" augšējā labajā stūrī un sāc darbu.
